Statement

5.3.2001

Taimisto & Leivo Ay  
Tuomitie 2  
36110 RUUTANA

My formal report on the globe of the death at the request of you is as following:

I have been informed about your globe of the death in february 1999 before it has been used in motor-shows. I had then also the possibility to seen how it works. There wasn't measures about noise levels during the riding. The noise level of the bike is same as in a normal trialbike.

The fuel of the bike is contained two-stroke-oil and 98E-octain gasoline. Usually the shows are arranged indoors. There have been no harm or nuisance about exhaust gases even to the spectators in the first row.
